Geeson Wan

U.S. Citizen

Gerseneck | geeson-wan | gerseneck.github.io | wang14240@gmail.com | +1 765-409-4313

Education

Purdue University exp. May 2029

B.S. Computer Engineering *West Lafayette, IN*

- **Relevant Coursework:** Electrical Engineering Fundamentals (ECE20001), Advanced C Programming (ECE26400), Electric & Magnetic Interactions (PHYS27200), Discrete Math (ECE20869)
- **Extracurricular Activities:** IEEE Computer Society (Event Coordinator), Purdue Badminton Club
- **GPA:** 3.96

Skills

Programming Languages	Python, Java, C, C++, Ruby, Lua, HTML/CSS, JavaScript, & LaTeX
Hardware	Arduino IDE, Bread-boarding, Digital Multimeter, Oscilloscope, Benchtop Power Supplies & Waveform Generator, Microcontrollers
Frameworks	Ruby on Rails, StimulusJS
Tools/System	Git, Vim, Bash, & Linux
Languages Spoken	English (Native), Mandarin Chinese (Native)

Projects

Tempo Clock | Arduino, Embedded https://github.com/Gerseneck/tempo-clock

Personal Project *June 2026 - August 2026*

- Designed and implemented an embedded chess clock with configurable time controls, non-blocking firmware, and a menu-driven LCD interface
- Developed a modular firmware architecture using state machines for timing, input handling, display updates, advanced logging, and persistent settings
- Implemented EEPROM-based storage for user preferences and game statistics, along with software debouncing and audio alerts

Game Boy Emulator | C Purdue IEEE Computer Society

January 2026 - Present

- Implemented CPU instruction decoding and register emulation in C
- Refactored emulator subsystem interfaces to improve modularity and debugging
- Authored architecture and debugging documentation for emulator components

GatherPack | Ruby on Rails, StimulusJS, PostgreSQL https://gatherpack.com

May 2024 - Present

- Developer of a full-stack event management platform using Ruby on Rails and StimulusJS
- Designed event scheduling subsystem supporting large events and calendar synchronization
- Designed responsive UI components optimized for mobile devices
- Currently used by multiple FIRST Robotics Teams as their core event management infrastructure

Professional Experience

Purdue Undergraduate Teaching Assistant August 2026 - Present

Physics 27200 Electric & Magnetic Interactions *West Lafayette, IN*

- Assisted with weekly class sessions by providing help with review materials and help on difficult concepts
- Provided assistance by keeping students focused and engaged with key concepts relevant to weekly lectures
- Mentored and engaged with over 110 students across 3 sections per week throughout the fall semester

Internship at Sledgehammer Infosystems June 2023 - August 2023

Full Stack Web Development *West Lafayette, IN*

- Developed features for a Ruby on Rails web application using MVC architecture
- Developed new features and bug fixes using Git-based collaborative development workflows
- Researched and integrated unfamiliar tools and libraries through technical documentation

Other Experiences/Achievements

Purdue Alpha Lambda Delta Phi Eta Honors Society March 2026 - Present
